

WATERSTREET
COMPANY

Business **Intelligence** for Claims

WaterStreet Business Intelligence enables insurance management to analyze operations with pre-built and ad hoc reports, dashboards, and scenario modeling using standard insurance calculations. The ability to seamlessly drill down into multiple directions within the data with insightful graphic renderings brings the data alive and helps decision-makers identify opportunities and risks.

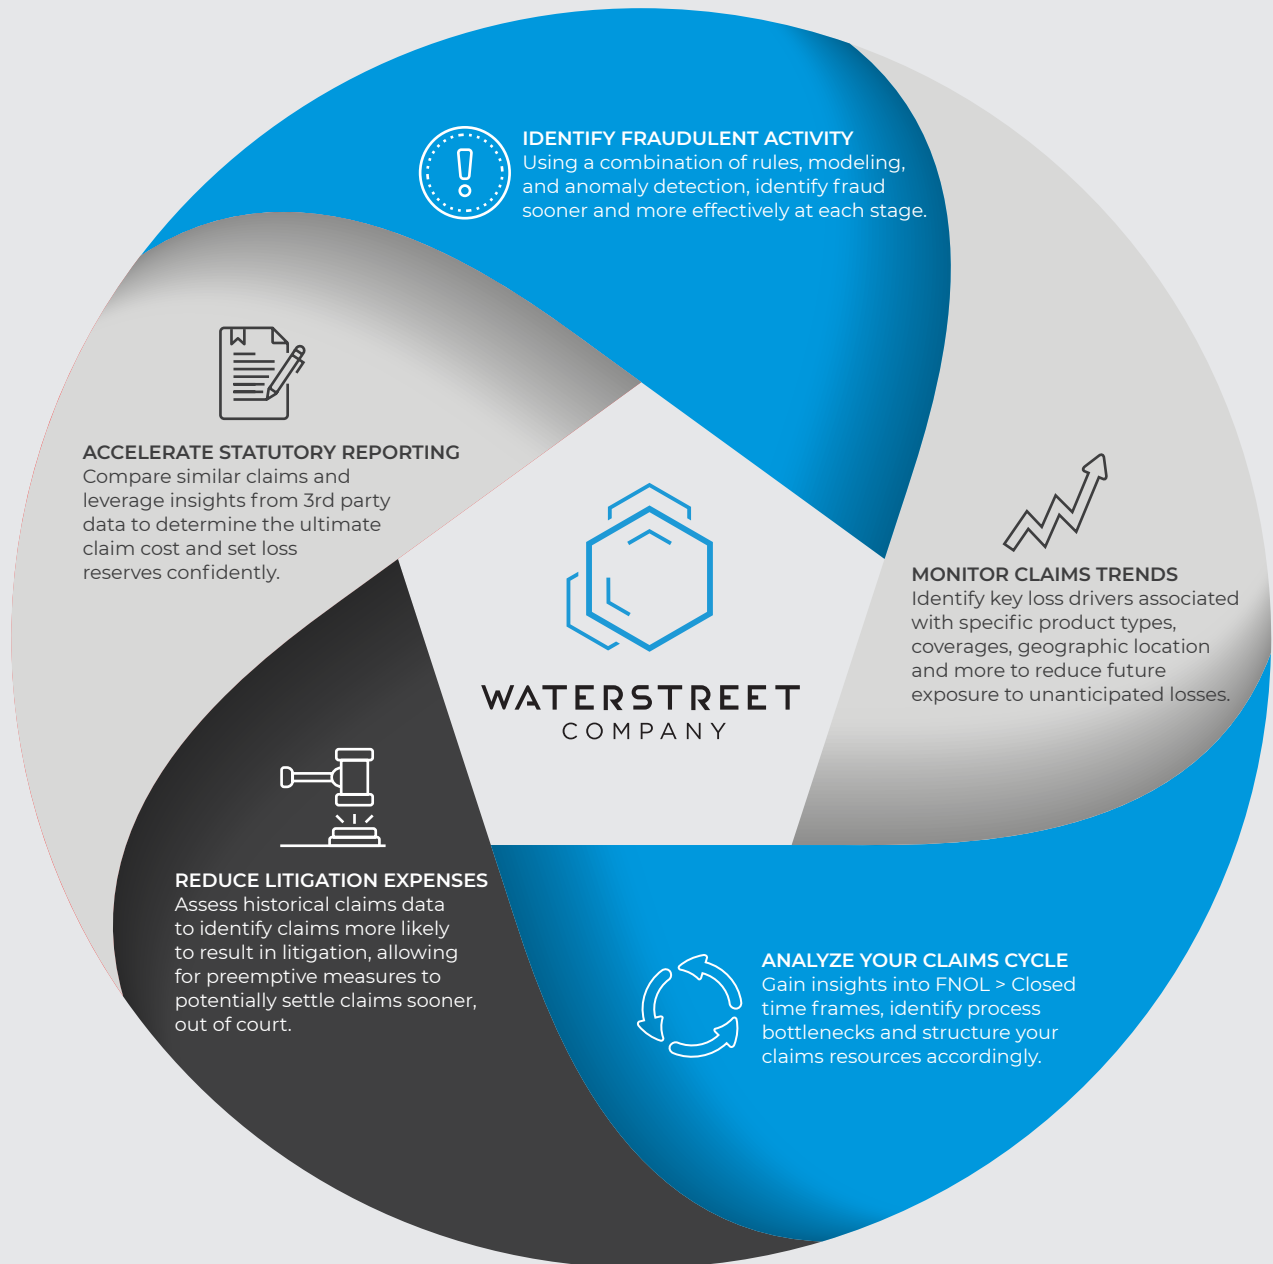

WaterStreet Business Intelligence provides deep insights into claimant pools and powerful exception-based reporting, so insurance companies can identify fraud sooner and more effectively at each stage of the claims cycle.

Business **Intelligence** for Claims

Insurance claims managers are faced with the unique challenge of predicting the future based on past events and experience. This requires extensive data analysis, especially when managing significant workloads and potentially high-cost claims. Additionally, fraud detection is critical for claims managers. The ability to spot inconsistencies is imperative for insurance companies to identify suspicious cases and avoid costly pay outs for fraudulent claims.

Empower your Claims Workflow with WaterStreet

Data Model Tailored to the P&C Insurance Industry

Most horizontal solutions offer a one-size-fits-all approach that is too generic to provide the policy detail that you need and limits analysis capabilities. Our insurance data warehouse model design follows industry-proven dimension- modeling standards, and stores data at the lowest possible level of granularity. Concise policy information is detailed down to the coverage and risk parameter level. Claim information includes individual payments, historical reserve estimates and full tracking of claim status changes.

The WaterStreet Business Intelligence insurance data model was built for P&C insurance from the ground up, and therefore is highly optimized for fast and flexible insurance-specific queries. A lot of work and effort has been put into each calculation method, index, fact table and other data structures to achieve a highly efficient yet standards-compliant P&C insurance data warehouse.

WaterStreet Advantage

Key Data Insights

WaterStreet provides many out-of-the-box reports which are critical to running an insurance business effectively. Our extensive library of reports and dashboards takes advantage of a rich data model to provide reporting at levels most carriers cannot access. Even better, standard reports can be quickly customized to company-specific needs.

Industry Data Experts

Our configuration engineers and data analysts are all AIDA certified through the institutes and continuously work to improve data models to better serve the P&C industry.

WaterStreet Understands Your Business

We know the challenges that carriers face in managing business because we come from the insurance industry. We draw upon decades of knowledge and first-hand experiences to bring you industry best practices.

Helping insurance companies for over **20 years.**
